

How to measure your wrist for bracelet size

To determine the bracelet size

1. Measure your wrist with a provided measurement tape (or any flexible tape measure you have) where you would normally place a watch or bracelet. Pull the tape snugly to get the most accurate measurement.
2. Add about 1/4"~1" to your wrist measurement, depending on how tight or loose you want the bracelet to fit. (see below for details)
3. Select the nearest size larger than your measurement, if your size falls in between our bracelet measurement.

Fitting Style	Add to your measurement
Snug	add 1/4" to 1/2"
Comfort	add 1/2" to 3/4"
Loose	add 3/4" to 1"

**DO NOT SCALE WHEN YOU PRINT.
PRINT AT 100% TO USE GUIDED RULER.**

Basic Guideline to Bracelet Sizing

Below are a simple guide on how to measure your wrist size for your bracelet.

1. Wrap

2. Measure
